This document is provided as a supplement to the *MMA Reference Manual* which lists all of the commands in the program and helpful information which can be used to create your own “style” files. If you are a newcomer to *MMA* you should also have a look at the *MMA Tutorial* for some “getting started” information.

The information in this manual has been generated directly from the library files included in the standard distribution. Each section uses the filename as a header and then lists the various defined grooves.

You should be able to use any of these grooves in your files without using other directives. However, if you have files in non-standard locations you may need to properly set the library path in a *MmaRC* file with the *SetLibPath* directive or by explicitly loading the library file(s) with a *Use* directive.

The filenames are in all lowercase. These are the actual filenames used in the library. If you are loading files with the *Use* directive you must use the same case.¹

Following each groove description is a boxed number in the form **4**. This indicates the sequence size of the groove. Next, is a list of tracks and instrument names. This shows the first voice or drum note defined for each track—it is quite possible that the track uses other voices. This data is included so that you can see what tracks are active.

The library files supplied with *MMA* contain embedded documentation. The **-Dx MMA** command line option extracts the following information from the each library file:

- ♪ The filename from the “Doc File” directive.
- ♪ The file description from the “Doc Note” directive.
- ♪ Each groove description: This is the optional text following a *DefGroove* directive.
- ♪ The sequence size. This is extracted from the current groove information and was set with the *SeqSize* directive. It is displayed in a small box after the groove description.
- ♪ A “summary” of the voices used in the groove. Note that a different voice or MIDI note is possible for each bar in the sequence size; however, this listing only lists the selection for the first bar.

¹Please note that typographic case applies only to the filename (this is operating system dependant). GROOVE commands are case-insensitive.

During the development of *MIA* the library files have improved to the point of being quite reasonable. They never will substitute for professional players, but that never was the intention.

Still, some of the files need some help. Some, frankly, need quite a bit of help. Hopefully, you, the intelligent user, will make them better and share the results with the ever growing *MIA* community. Thank you!

2.11 boggiewoggie

A standard boogie-woogie blues beat. Great if you like this style; I find it gets old on my ears fairly fast. NOTE: This style uses dominate 7ths in the bass patterns. It'll probably not sound good in songs with Major 7th or Diminished chords.

2.16 chacha

The Cha-Cha-Cha remains a popular rhythm with broad audience appeal, despite the fact that it is somewhat dated and made trite by Americanized versions. I've used "Rico Vacilon" as a demo. This file was mostly developed from the patterns in "Latin Rhythms: Mystery Unraveled" by Victor Lopez.

2.21 dixie

These Dixieland grooves are great for songs like “Bill Bailey”. The Time is set to 4, so if you have a 2/4 piece double the tempo. This rhythm works best with tempos around 200. This might be a bit busy, if so you’re free to make changes!

2.27 frenchwaltz

These try to do the “French Cafe” sound. The song “Pigalle” works quite well with this. Note the setting of the BassRegister variable which tries to emulate the “switches” on a real accordion. In this case we have an accordion with three reed banks labeled “L”, “M” and “H”—this will make large changes to the accordion um-pa-pa stuff

Variables

BassRegister Sets the bass register, 1=L 2=LM 3=LH 4=LMH 5=M 6=MH 7=H (Default=4).

2.37 mambo

The Mambo was popularized by the great Cuban bandleader Perez Prado. The sample song “Patricia, It’s Patricia” is a decent demo. This file was mostly developed from the patterns in “Latin Rhythms: Mystery Unraveled” by Victor Lopez. The variations in this file are mostly borrowed from the Rhumba library.

2.38 march

Sousa would love this file. These all need a bit of work—they tend to sound a bit ponderous and/or heavy. The sequences assume 4 chords per bar, but most marches are in 2/4 time. So, double the tempo for “proper” results.
