8. Liste des logiciels contribués

Ce logiciel a été originellement dérivé de la version 0.1 de William F. Jolitz's 386BSD, qui ne comportait plus de code spécifique à 386BSD. Ce logiciel a été essentiellement ré-implémenté depuis la version 4.4BSD-Lite fourni par le groupe de Computer Science Research (CSRG) de l'université de California, Berkeley et des contributeurs associés.

Des portions de NetBSD et OpenBSD ont été intégrés à FreeBSD, et nous remercions aussi les contributeurs de ces projets pour leur travail.
