

The verbose-inote style

This citation style is a slightly more compact variant of the `verbose-note` style. Immediately repeated citations are replaced by the abbreviation ‘ibidem’ unless the citation is the first one on the current page or double page spread. This style is exclusively intended for citations given in footnotes. If you want ‘ibidem’ to be printed in italics, redefine `\mkibid` as follows:

```
\renewcommand*{\mkibid}{\emph}
```

Note that ‘ibidem’ is sometimes taken to mean both ‘same author+title’ and ‘same author+title+page’. By default, this is not the case in this style because it may lead to ambiguous citations. If you prefer the alternative interpretation of ‘ibidem’, set the package option `ibidpage=true` or simply `ibidpage` in the preamble.

This style defines a package option called `pageref` which adds the page to the footnote number pointing to the full citation if it is located on a different page or page spread (depending on the setting of the `pagetracker` option). Set the package option `pageref=true` or simply `pageref` in the preamble if you want such references rendered as ‘see note 3, page 5’.
